

8x4 EZ-Build Extension Shed Extensions

**You will need to purchase 3 more 8' barn hoops for every 4' if extension that you would like to add.

Replace the back wall hoop from the original kit with one of the new hoops move the hoop with the back wall framing to the back of the shed.

Unfold the other hoops and nail on one gusset same as instructions in main kit.

Nail one hoop directly to the last hoop from the main kit face to face with 3" nails on a slight angle doubling up last hoop from main kit.

Use the 2"x 4"x 48" treated rim board to extend off the existing rim board from the main kit. Nail through rim board into heel of hoop with 3 ¼" nails.

Add all 2"x 4"x 21 ¾" blocking to floor in same location as main kit.

Place pre-cut ¾" treated floor plywood in place and nail with supplied 2" nails.

Place Smart Panel wall siding on walls as explained in mail kit using 1 ½" nails.

Nail on all of the pre-cut O.S.B. sheeting in proper locations of roof using 1 ½" nails.
